

Stackable Slatted Wood Shoe Rack

A 1 ea
Top Frame

B 2 ea
Side Frames

A rubber mallet may be used to ease assembly.

Step 1: Assemble the rack upside down. Align the tabs and push onto the side frames (**B**) until fully inserted into the top frame (**A**) - **NOTE:** it can be a tight fit. If available, use a rubber mallet (not included) and gently tap on the side frames (**B**) to ease assembly. Side frames are designed to fit tightly for stability and require a firm push for proper assembly.

Note: This is the correct orientation.

Step 2: Flip the rack right side up and ensure the legs are firmly seated.

Note: Multiple units may be stacked. Please use an anti-tip kit (not included) if height exceeds 36 inches.
