

Instructions for Easy Installation & Assembly

The Container Store®

elfa® décor Primary Fascia

Install Fascia on the Ventilated Shelves

TIP

■ Please position ALL pieces of Fascia before installing clips.

- Position the Fascia with the opening facing the ventilated shelf. **(Figure A)** The notch in the Fascia that hooks onto the front support wires of the ventilated shelf should be at the top. Hook over top wire with a downward motion, secure it to the front of the shelf.
- Use the included clips to secure the Fascia to the ventilated shelf.
- The top of the clip features a groove that accommodates one shelf wire. **(Figure B)** Once it's attached to the underside of a shelf wire, slide it all the way to the front of the Shelf and into the opening of the Fascia for a secure hold. **(Figure C)**
- Repeat with another clip at the opposite end of the Fascia. If you are installing a 2' Fascia, add the third clip at the center of the Fascia.
